JACKSON

There is no simple fix with a kiss to the forehead. Will Jackson learn to hear the chatter in his head and know what to do about it? Will love and hope prevail?

With unwavering empathy, Jackson is a bold and unforgettable story of a family navigating through the terrifying waters of mental illness. Jackson's battle to take control over his own mind and life portrays what millions of people are fighting around the world: Mental illness. His mother, desperate to free him from his demons and desperation, faces her own turmoil and anguish, doing anything possible to save her son, through love and hope.

TAKING THE HELM

Join Lynn as the host of the podcast. "Taking the Helm", now celebrating its fourth year

Guests are now speaking openly about children's emotional well-being and what we can do as adults to be proactive rather than reactive.

What do our children need to learn and experience before the age of 10 to have the tools and mindset they need in today's challenging world?

THE POWER OF THOUGHT

When children learn to manage their emotions at a young age, they can problem solve and find positive solutions to everyday situations. Teaching emotional vocabulary gives children the tools they need to build confidence in themselves and minimize their anxiety levels as they grow into adulthood.

"The Power of Thought" children's book series has been developed alongside clinicians, educators and parents to use as a proactive resource in teaching children emotional literacy.
